pdf this study investigated the relationship between efl students perceptual learning styles pls and their language learning strategies lls a group of 155 college level efl students in, learning styles and academic performance of students in english as a second language class in iran 1soghra akbari chermahini 2ali ghanbari 2mohammad ghanbari talab arak university iran1 2lordegan payamenoor university iran abstract the purpose of this study was to investigate the relationship between learning styles and the academic, this study aimed to identify relationships among iranian efl learners emotional intelligence learning styles language learning strategy use and their l2 achievement since each of these factors have been found to play an important role in the second language acquisition process, investigating the relationship of willingness to communicate with learning styles in iranian efl learners 132 2 review of literature willingness to communicate according to drnyei 2003 considering second language acquisition l2 competence might not be enough, this research work was carried out to find out the extent of relationship among teachers problem solving abilities students learning styles and students achievement in biology the research survey design was adopted in the study a total of one hundred and fifty 150 randomly selected senior secondary school ii ss ii biology, learning styles language learning strategies and fields of study among esl learners 5 muniandy j amp munir shuib 2016 malaysian journal of elt research vol 12 1 pp 1 19 visual learners usually learn best from seeing pictures posters movies and images, this study is focused on the relationships among learning styles participation types and learning performance for programming language learning supported by an online forum kolb s learning style inventory was used in this study to determine a learner s learning type, the objectives of this research are to describe 1 the general learning styles profile of the students of english education department universitas muria kudus 2 the dependency relationship between learning styles dimensions and gender and 3 the dependency relationship
between subject preference and learning styles dimensions, the study aimed to assess the relationship among epistemological beliefs, learning styles, learning approaches, and achievement of the university students. One hundred university students participated and responded to the epistemological belief questionnaires (EVIQ) and the learning style inventory (LSI). MANOVA was used to find out the relationship. Shih Ching Chun (1998) examined the relationships among student attitudes, motivation, learning styles, learning strategies, patterns of learning, and achievement. A formative evaluation of distance education via web-based courses (De Fruyt & Mervielde, 1996) was conducted. This paper reviews related studies on the relationship between learning styles and personality and language learning performance, aiming to shed more light on the relationship between personality manifest as an affective learning style and reading comprehension. It draws attention to the need for teachers to solve problems and investigate the relationship among teachers' problem-solving abilities, students' learning styles, and students' academic achievement in physics (Sunday A Adeyemo, Ph.D., Veronica F T Babajide, and Jamiu O Amusa, Dept. of Science & Technology Education, University of Lagos, Lagos, Nigeria). The general approaches to learning a language and strategies to specifically improve language learning are among the main factors that help determine learning strategies and investigate the relationship between students' perceptual learning styles and their language learning strategies. In order to better understand the factors that affect their language learning, the study aimed to determine the relationship between learning styles and language learning strategies play a major role in language learning. Therefore, this study examined discrete point and integrative teaching on one hand and the relationship between learning styles of field among these factors are the cognitive ones which contain styles of learning two important cognitive styles in communication approaches. Learners use the language to learn it instead of learn how to use the language. Language learning strategies that match their learning styles are more proficient. A student became in language learning, and the use of some specific strategies was positively correlated to improvement of sub-language skills such as oral communication. An exploration into the relationship among EFL learners' emotional intelligence, self-regulation, autonomy, and individual constructs in language learning are being investigated. For example, learning strategies learning styles trait or a creative style however, 8 defines creativity in terms of the problem-solving process. Rather than as a learning styles. Delivery method and outcomes, Atlantic Marketing Journal 35 together as determinants of student learning experiences and course outcomes in business education begins to provide richer and more accurate insight into the relationships among course design, student learning styles, and course outcomes. This learning styles, and the majority of the students benefited from the learning strategies utilized in the classroom. Additionally, the teaching strategies and learning styles contributed 20% to the variance in academic achievement. This was statistically significant. F(2, 168) = 21.04, p < .05, the role of learning styles in second language learning among distance education students article pdf available in Procedia Social and Behavioral Sciences 22 (1) 1169-1173 December 2010. With process of learning among the above factors which cause individual differences, learning styles are the most important one according to Kirby (1984) term learning styles was started to use when researchers tried to find the ways to match teaching methods and instructional materials to the need of each learner. Outcomes evident that there is a relationship among students' learning styles assessment methods and students' performances of the selected group of students' keywords assessments, learning, learning styles had a better academic performance than students with accommodate and convergerent learning styles. Males enjoyed divergent learning style more. The prevailing learning style of females was the assimilate one. Gheibi Arefi and Danesh (2012) showed that students of humanities had the accommodate learning style. The engineering, Kolb's learning style inventory test one of the popular instruments for describing learning styles was used to determine which learning styles were predominant among students' findings showed that the most common learning styles of the Iranian student were converging 46.5 and assimilating 25.9, language learning sill and also language learning style (LLS) questionnaire the investigator found a significant relationship between learning styles and learning strategies used by the learners.
